Birthstone— Emerald

The emerald is the birthstone for May. This stone's name was derived from the Greek word smaragdos, which is a term that was applied to several kinds of green stones. In the Middle Ages, the stone was thought to foretell the future. It was also believed to cure epilepsy and fever and to protect the wearer from panic. Emeralds frequently occur inside shale, a fine-grained sedimentary rock. They are found in many parts of the world, but Colombia is known to mine the largest and highest-quality emeralds.
